Athlone, Co Westmeath

26/10/2023.

I am writing to express my sincere interest in the software design placement opportunity at Your company.

As a Software Design student currently enrolled at the Technical University of Shannon Athlone, I am eager to bring my passion for working alongside people and enthusiasm for software development to your team.

I am excited about the prospect of contributing to your company and continuing my personal and professional growth in your dynamic and innovative environment to obtain better understanding of the industry. I look forward to the opportunity to discuss how my skills and passion align with your team's goals and values.

In terms of technical skills, I have acquired proficiency in a range of object orientated programming languages, including Java and of which I use to develop applications for them within a plan driven or agile driven projects.

I am committed to gaining firsthand experience and honing my skills in a professional setting. I believe my work ethic, adaptability, and determination to excellence will make me a valuable addition to the your company's team.

Thank you for considering my application. Please find my resume attached for your reference. I am available for an interview at your earliest convenience and can be contacted by 0877185538 or via email at matthewdevlin18@gmail.com.

faithfully, Matthew Devlin

Personal Profile

As a Software Design student currently enrolled at the Technical University of Shannon Athlone, I am currently in my third year of my Bachelor of Science Software Design with Mobile Apps and Connected Devices course and seeking a placement position. I've an interest and passion for developing software and working alongside individuals, . I've an aim to improve the skills I've acquired so far within this field, additionally enhance the team skills/leadership I've developed among my peers so far.

Skills Summary

I've a proficiency in programming OO languages such as Java, and I have studied and obtained additional knowledge of web-related development languages like PHP, CSS, HTML and SQL.

I am adept at using development environments like Eclipse, VSC, and PyCharm IDEs. My competencies extend to understanding network design, architecture, and communication, operating and utilising Single Board Computers and microcontrollers , and developing applications for Android devices.

Additionally, I have a solid foundation in the basics of Microsoft Office applications such as Excel, Word, and PowerPoint.

I have studied and utilised both agile and plan-driven life cycle development methodologies. I am adept at adapting to the flexible and iterative nature of agile development, as well as the structured and phased approach of plan-driven development, depending on the project's specific requirements and constraints.

Employment History

Previously had the opportunity to intern at Vertice Cloud, a company specializing in database security and a subsidiary of Oracle. During my time there, I gained invaluable experience working on large-scale industry projects. This internship deepened my understanding of how to collaborate within a team, meet project goals, and deliver solutions that align with the expectations of project managers and stakeholders.
